MARINE TECHNOLOGY SOCIETY INDIA SECTION

presents

2nd Techsurge

Technologies and Innovation for Sustainable Fishing (TISF)

Safety Security Navigation Technology

Friday, 10 August 2018

Chennai, India

Focus

The harvesting of marine resources has increased manifold and this calls for the urgent need for bringing sustainability through use of appropriate technologies. Marine Technology Society India Section through its annual event 'Techsurge' strives to find high-tech solutions for improving and optimizing the resource utilization and the effort and money spent on fishing and increase the overall efficiency of the process in a sustainable manner.

Who should attend

Target audience from Industry, Research, Academia, Government, pursuing Students and others. Students are also encouraged to submit posters on their innovative ideas.

Outcome

The outcome of the Conference is to popularize the available technologies and future cutting-edge technology on Safety, Security and Navigation to the user groups.
